

# SmartHome Concept

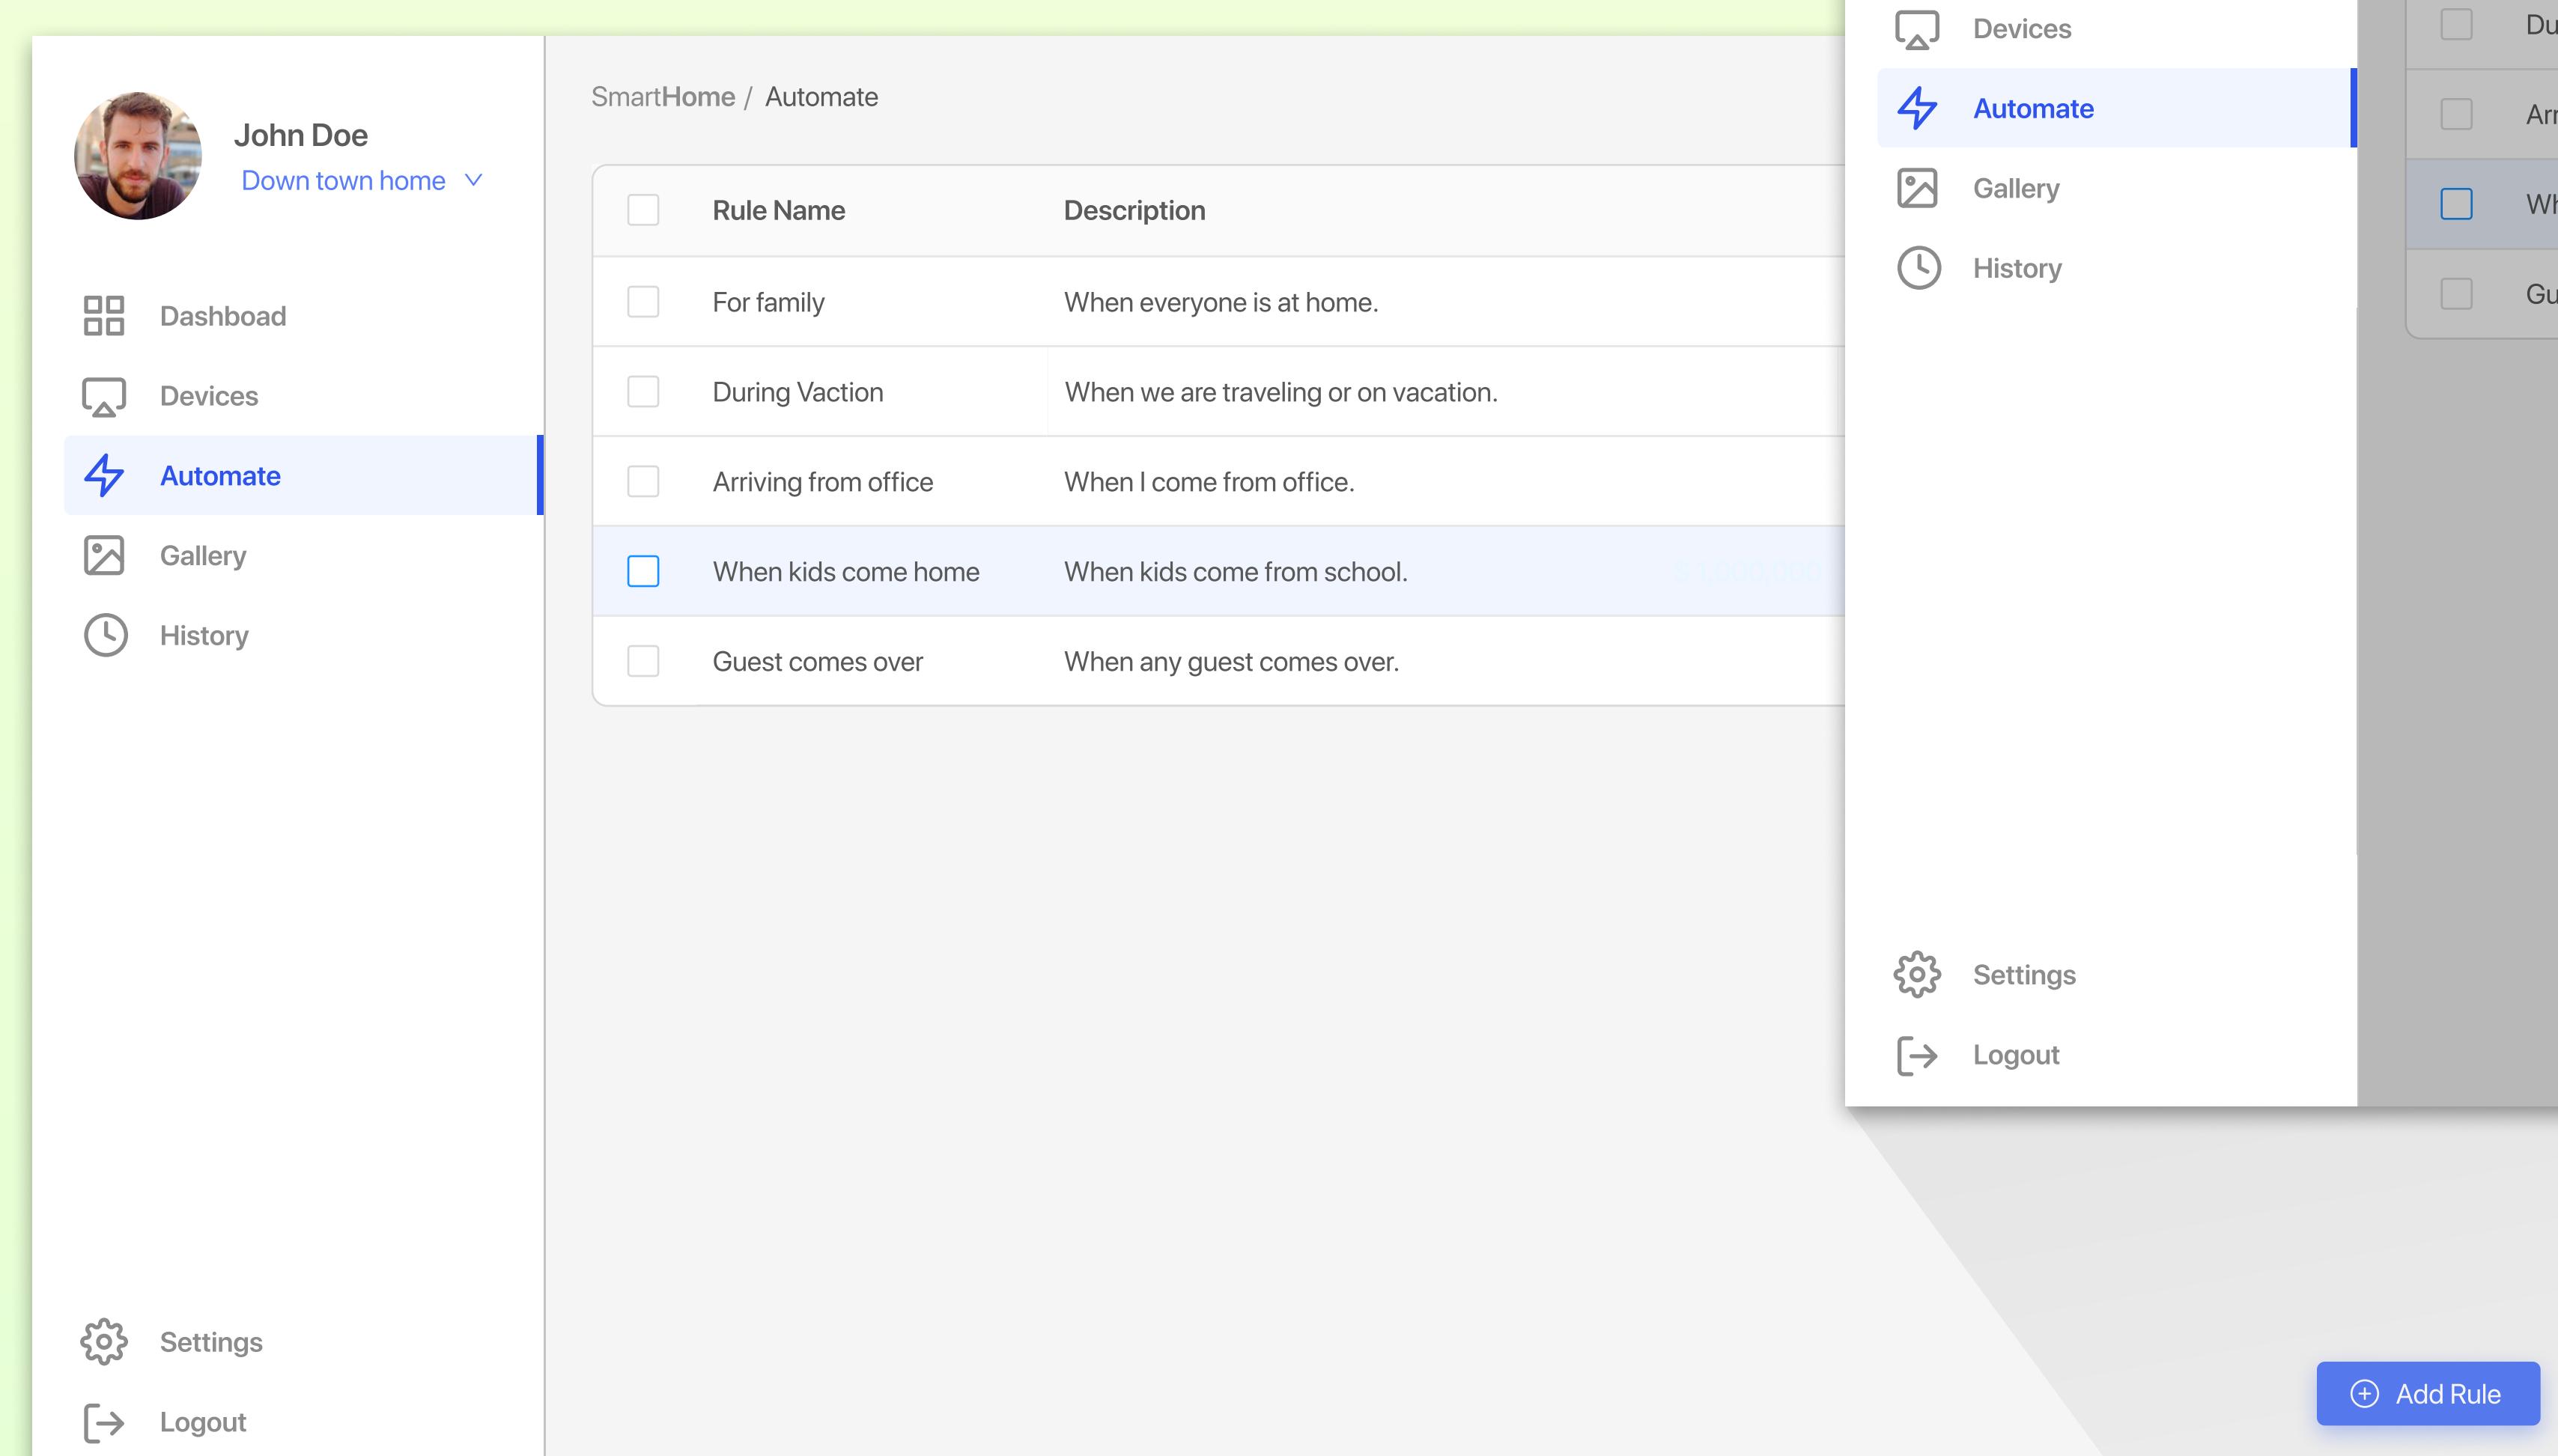

The dashboard provides a comprehensive overview of the home's energy consumption, savings, and temperature. It includes a live video feed from a hallway camera, a weekly energy consumption chart, and a real-time activity log showing recent events like a front door opening and a fridge status update.

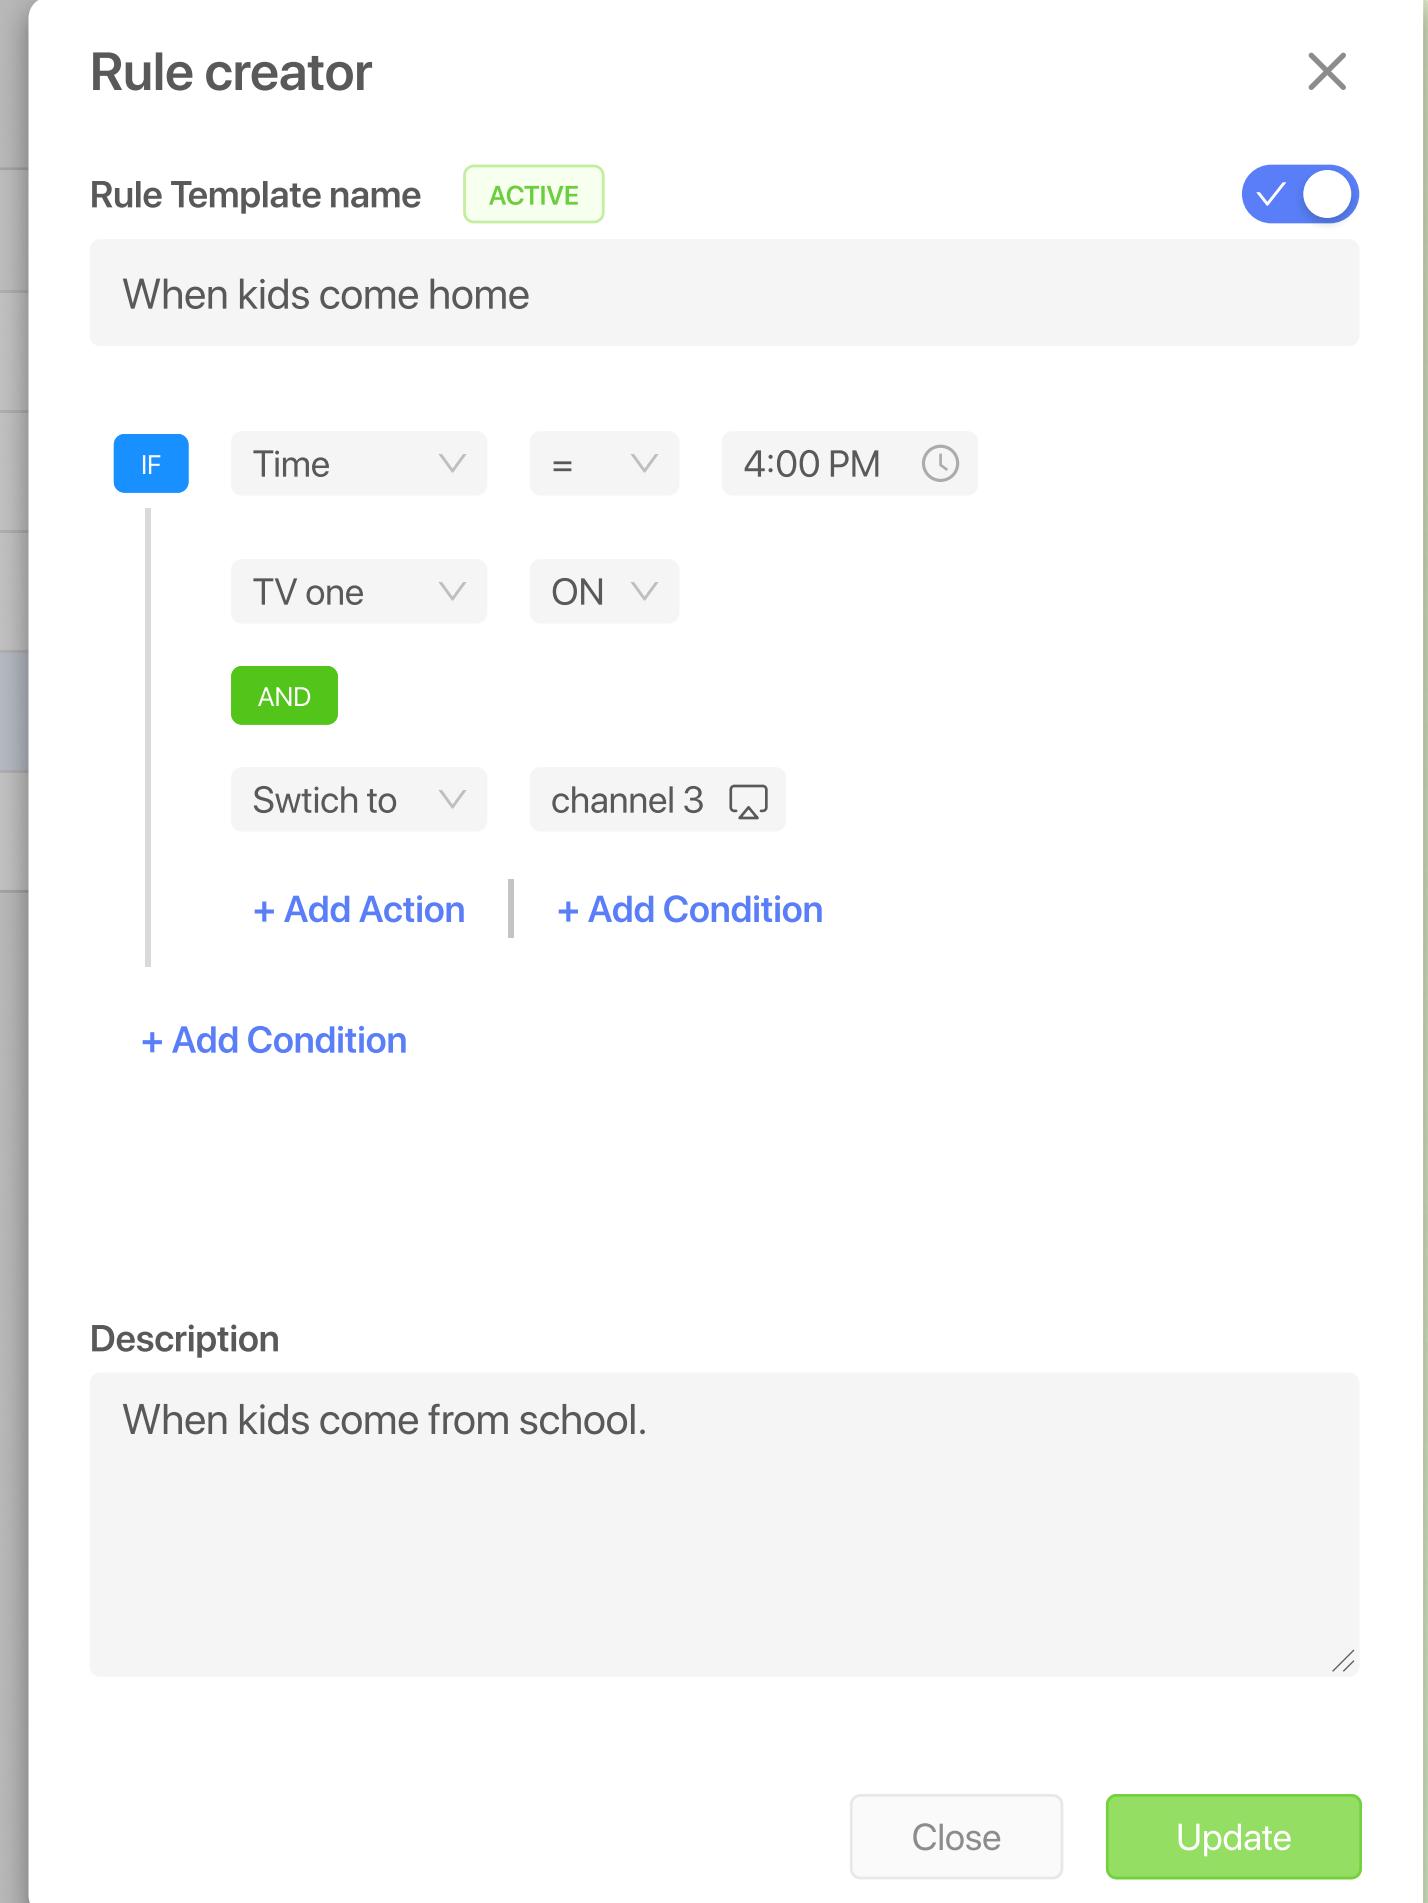

comprehensive & customisable dashboard

## Advanced & customisable automation

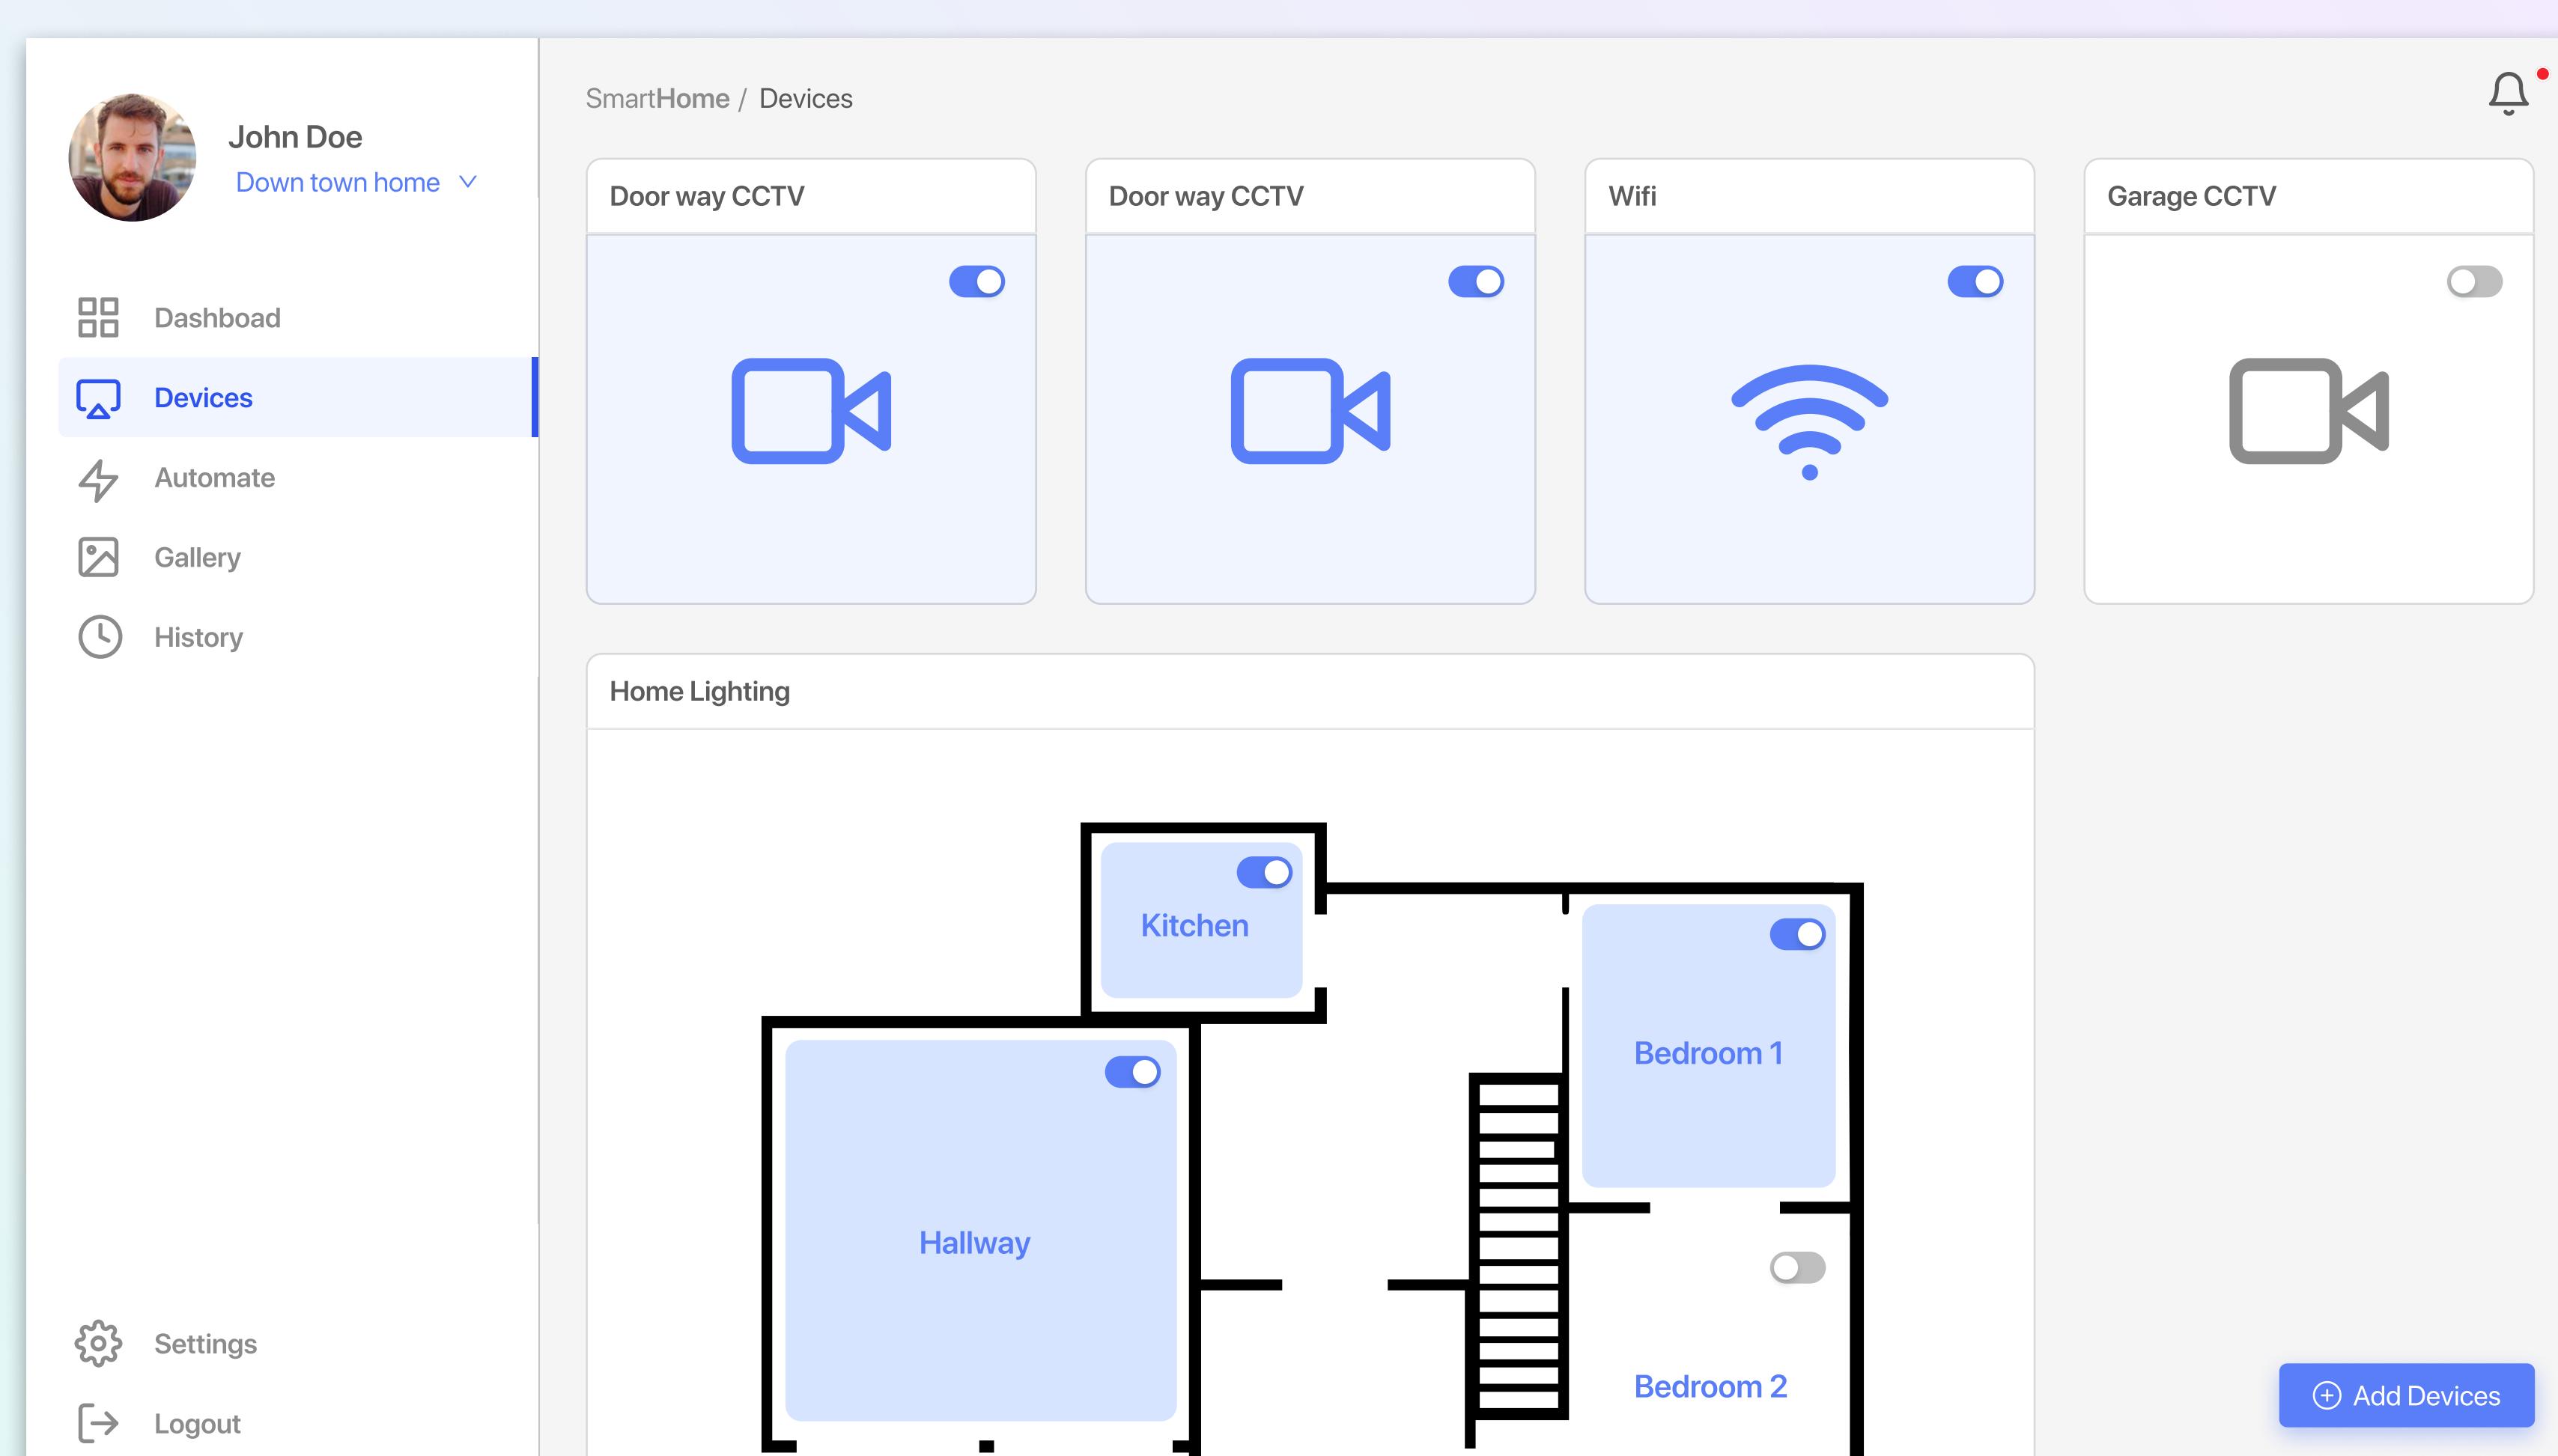

The automation section allows users to create rules based on various triggers and actions. A specific rule for 'When kids come home' is being edited, setting a TV to turn on at 4:00 PM and switch to channel 3.

**Rule creator**  
Rule Template name: ACTIVE  
When kids come home  
IF: Time = 4:00 PM  
TV one ON  
AND  
Switch to channel 3  
+ Add Action | + Add Condition  
Description: When kids come from school.  
Close | Update

## Connect and control any devices & IoT

The device control panel shows four connected cameras and a lighting system diagram for the kitchen, hallway, bedroom 1, and bedroom 2. Each device has a control switch next to its icon.
